Programming languages:

PHP, HTML, CSS, Javascript, JQuery

Frameworks:

Symfony, Zend

Databases:

MySQL

PostgreSQL

Mongo DB

Messaging

RabbitMQ

Methodologies:

TDD, SCRUM, AGILE, KANBAN

Experience

Ascend NetSolutions

Senior PHP Developer

August 2019 - Present (4 years 3 months)

Bucharest, Romania

Senior Web Programmer at Ascend NetSolutions

eJobs Romania

Senior PHP Developer

October 2017 - July 2019 (1 year 10 months)

Bucharest, Romania

Using Symfony 3.6 as a microservice, with rabbitmq for sending emails.

This project was a monolith project and we started to upgrade it to small little projects (microservices).

Most of the small projects are using symfony as framework. We have one in node.js as well.

As technologies we are using php 7+, mysql, rabbitmq, node.js and typescript (for frontend).

For server configurations we are using linux with kubernetes and docker containers. The main part of interactions with the containers are using an inhouse discord bot with whom we deploy different projects.

eMAG

PHP Developer

October 2016 - October 2017 (1 year 1 month)

Bucharest, Romania

Symfony 3.6 based microservice for sending emails and notifications. Using Doctrine ORM for database mapping and rabbitmq for messages that we had to sent.

Basically we had some rabbitmq consumers that were listening for some queues on the server. We took that payload and process it by the type of it, create the html message (or sms or push notification) and then send it to the client.

The messages were saved in the database for statistics (MySQL and MongoDB).

The code was uploaded on company git servers and we were using linux on the working stations and we had graphics about sendings, errors, statistics.

My1Outsourcing

Programmer

May 2013 - August 2016 (3 years 4 months)

Bucharest, Romania

Headquartered in Akron, Ohio and designed by a broker with over 20 years in the industry, My1HR, Inc. provides cutting edge software solutions and professional services to health insurance issuers and brokers. Today, thousands of insurance brokers use My1HR technology to quickly and accurately quote and directly enroll their customers through one of our INSXCloud Issuer Platforms or the INSXCloud Broker Direct Enrollment Platform.

My1HR saves brokers and insurance companies time and money by providing turnkey solutions:

For Brokers: Write more business with INSXCloud. Our Broker Platform allows brokers to quote, directly enroll, and track applications in less time – all from the same easy-to-use interface.

For Issuers: INSXCloud helps increase efficiency and improve customer satisfaction with our fully integrated Issuer Platform.

As technologies we used git, linux, Zend Framework 2 and MySQL.

One Image Solutions

Programmer

August 2009 - May 2013 (3 years 10 months)

Educastream is No. 1 in education via videoconference

Educastream has developed a unique solution for videoconferencing courses combining all the advantages of different types of assistance (home tuition, educational materials and e-Learning).

The activities focus on four services:

Tutoring (English classes, math)

English classes for adults

Corporate Training

Videoconferencing language in schools

Educastream partner of French National Education

Educastream was chosen by the French National Education under the plan “1000 videoconferences” to meet the skills objectives set by the Common European Framework of Reference for Languages.

We have designed and developed the entire application framework to manage the videoconferences.
